

## SERIOUS AERO ADVANTAGE.

Everything the Talon has to offer, and less. That's right – less. The Talon SL weighs in at about half a pound less than its sister, the Talon. Same great aero technology- same great versatile dual-position seat post – even greater speed.

An Ironman Champion, the Talon SL gives you everything you want in a versatile, super-light frame: power, efficiency, speed. Take your riding to the next level.
